

To the parents of our new St. Agnes students,

Welcome to St. Agnes. We are attaching brief instructions on how to log into Mathletics, our online math skills practice and assessment program. This is now a required summer activity for St. Agnes students.

Step 1: go to <http://www.mathletics.com>

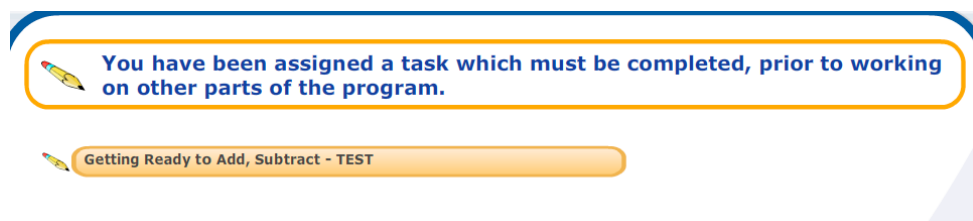

Step 2: Sign into your account by clicking on the sign in button on the right.

Step 3: The FIRST time students log in, they will see two buttons; one for girls and one for boys. They need to click on the appropriate button and set up their AVATAR. This is the face that other people will see when they are racing against each other. Students will add the nose, eyes, etc. that they want and then they need to click on the SAVE AND EXIT button.

Step 4: If your student's teacher has given them an assignment, they will see that assignment appear when they exit their avatar. See example below. If your student doesn't understand how to do a problem, they can click on the question mark on the left hand side of the page for instructions.

Step 5: When students have finished their assignments, they can go into the racing module by clicking on the “Play Live Mathematics” button on the right hand side of the page.

To play against other students from all over the world, including some classmates, students need to click on the button with the world map on it.

Hope this explanation gets you off to a good start. Hope your student has an enjoyable, fun filled, and learning filled summer.
